I'm familiar with the phrase "Blind Justice" but perhaps I misunderstood it's meaning all of these years...

Microsoft is trying to do to the US legal system exactly what it has been doing to the entire computer industrie for as long as it's been around... Control it.

The proposed judgment is a joke. It is as clearly full of holes as Microsoft is guilty. Microsoft and its lawyers are trying to pull a fast one and the Government is playing right along. Many of the proposed judgments clearly HELP Microsoft!

Please reject the proposed judgment and continue the suit.

Thank you,
Brian Ray
